## Alstom in UAE

Over 30 years of commitment to Dubai's infrastructure

### History

Alstom has been supporting the development of the UAE for over 30 years, supplying the latest products and services to the country:

Alstom installed its first gas turbine in the United Arab Emirates in **1975**. Since then, Alstom's presence in United Arab Emirates has continued to grow. The UAE has a long and proud history in innovative industries. Alstom have been part of that history for over 30 years. Alstom has been present in the UAE, contributing to the development of the country's power and transport infrastructure. Today, being entirely focused on Transport, it is natural for Alstom to continue its operations in the UAE. More than ever, Alstom wants to support the UAE and the Gulf region who faces great need for infrastructure investment in terms of rail transport systems, especially since there is political will, knowledge, and opportunities to develop and deliver sustainable solutions.

**2008:** Awarded the contract for the Dubai Tram, first Citadis tramway contract in the Gulf region

**2012:** Awarded the maintenance contract for Dubai Tram

**2013:** Alstom to Supply of ERTMS level 2 on-board signalling system for diesel locomotives. Etihad rail – Abdu Dhabi- Stage 1 of the freight network

**2014:** Alstom delivers tracks for Dubai downtown transportation trolley system

**2014:** Opening of the Dubai Tram

**Dec. 19 2014:** Alstom Shareholders Meeting authorises the sale of the Alstom Energy businesses to General Electric

**2015:** Alstom finalises the sales of its energy activities and is entirely focused on Transport

Over 30 years of commitment to Dubai's infrastructure

### Alstom in the UAE

Alstom secured the first Turnkey catenary-less tramway project in the Middle East in Dubai: "The Dubai Tram". This project is considered as a flagship project for the Emirates' drive to provide an integrated transportation policy. Alstom Transport is also part of the prestigious Etihad rail project, with its leading ERTMS signalling solutions.

#### Alstom's projects include:

- RTA – Dubai Tram Design & Build contract inaugurated in November 2014  
Scope: Turnkey project management, consortium leadership, integration of civil works, phase 1 including 11 units, phase 2 up to 25 units, system engineering, rolling stock (CITADIS™402), power supply, track, Aesthetic Power Supply (APS), platform screen doors, railway signalling, communication systems, depot equipment, ticketing, maintenance during DLP (3 years).
- RTA – Dubai Tram maintenance contract  
Scope includes:
  - Preventive maintenance, corrective maintenance levels 1-5, accident and vandalism repairs and all overhauls during the 13 year maintenance period, with a further option for 5 more years.
- Etihad rail – Abu Dhabi- Stage 1 of the freight network – Supply of ERTMS level 2 on-board signalling system for diesel locomotives.
- Emaar properties - Alstom to provide tracks for Dubai downtown transportation trolley system - the first trolley system in the Middle East in September 2014

#### Customers

- Roads & Transport Authority - RTA (Dubai).
- Etihad Rail – Abu Dhabi (freight network in UAE)
- Emaar properties
