

Alstom has played a central role in the recent development of Peru's **urban transport** infrastructure.

19 Alstom Metropolis trains have been operating on the first line Lima Metro since 2013, providing a reliable, comfortable and environmentally friendly transport service for the habitants of the city. The concessionaire of the Line 1 awarded Alstom in 2016 a contract to supply 139 additional cars to attend the growing demand of passengers.

Alstom looks forward to providing further solutions for passenger and freight for Lima and the country.

MAIN REFERENCES

Line 1 of Metro de Lima

This line connects the neighborhoods of Villa El Salvador and San Juan de Lurigancho, with a 34 kilometers stretch. The 19 Alstom Metropolis trains with 5 cars each entered in successful commercial operation in July 2013.

Lima Line 1 Maintenance Equipment

In 2013, Alstom won the contract to supply the maintenance equipment.

Maintenance

Since 2013, Alstom is charge of the supervision of the maintenance including engineering and on time supply of spare parts

20 Additional Metropolis Trains to enter in operation starting 2018

PROJECTS ONGOING

■ Lima Metro Line 1 additional cars

Alstom will supply 20 six-cars Metropolis trains as well as additional cars to lengthen the existing 19 Metropolis trains from five to six cars. As such, the transportation capacity will double from 20,000 to 48,000 passengers per hour allowing the reduction of the intervals between trains down to three-minute intervals.

■ Lima Metro Line 1 Maintenance Services

Alstom has been supervising since 2013 the maintenance of the 19 Metropolis trains.
