- 130 employees
Alstom in Vietnam

Over 20 years of contribution to energy and transport infrastructure development

History

1994: Opening of Alstom (formerly named GEC – ALSTHOM) Holding Representative office
1998: Alstom helped Vietnam Railways to modernise its four workshop in Ho Chi Minh City
2004: Established Alstom Vietnam Ltd.
2008: Established Alstom Grid Vietnam Ltd. (formally AREVA T&D Vietnam)
10/2012: License issued for Alstom PMTP Power Services LLC.
2014: Established Alstom Renewable Vietnam Ltd.

Corporate Social Responsibility

Alstom’s contributions to Vietnam’s future go beyond just building infrastructure.

In October 2012, Alstom Foundation signed an agreement with Save the Children to adopt the project named “Green Communities for Children in Mekong Delta” in Vietnam for a period of 1 year. Under this corporate social responsibility project, Alstom Foundation will support four rural communities in Can Tho & Tien Giang in becoming green communities for the children’s health and future. The project will also oversee the construction of safe water systems and latrines as well as education and best practice training for environmental awareness, water sanitation and trash disposal.

In 2013, Alstom Foundation, along with non-profit organization, Helen Keller International (HKI), embarked on an Enhanced Homestead Food Production (EHFP) programme to improve food and nutrition in the province of Son La, Vietnam. The second phase of this programme has commenced in October 2014 and will be regularly monitored to ensure that goals are met.

Partnerships

Alstom in Vietnam has made strategic partnerships with major local players bringing in advanced technologies and contributing to the significant energy and transport infrastructure development in Vietnam. As part of a major long-term investment in Vietnam and Asia, Alstom signed in May 2012 a JV agreement with EVN to establish a state-of-the-art gas turbine reconditioning workshop in the Phu My Power Complex. This is the first in the country and in Alstom’s network in Asia and started its operations in May 2014.

Awards and Certification

2010: Alstom Grid Vietnam - System Unit receives ISO 9001 certification
Alstom in Vietnam

Thermal & Renewable Power

Established since early the 90’s in Vietnam with the opening of offices in Hanoi and Ho Chi Minh City, Alstom has been a key player in the Vietnam power market for more than 20 years, participating in a number of prestigious power projects such as Son La, Lai Chau, Hua Na, Huoi Quang, Phu My, Nhon Trach. Alstom is contributing significantly to the development of the Vietnamese power production, boosting the country’s economic development.

Transport

Alstom Transport has made its contribution to the socio-economic development of Vietnam by successfully carrying out many important infrastructure projects in Rail Transportation:

- Modernization of Vietnam Railways workshop
- Modernization of Signaling and Telecommunication Hanoi-Vinh, phase 1

Today, Alstom Transport is involved in two signalling projects:

- Modernization of Signaling and Telecommunication Hanoi-Vinh, phase 2, and
- New Ninh Binh Signalling

Upon completion in June 2015, the quality and safety of all train operation on the line will be improved.
Alstom Grid Vietnam has been present in Vietnam almost 20 years, providing transmission solutions to important projects for Utilities and Industry customers.

Alstom Grid has been one of the main contractors of Electricity of Vietnam (EVN) since 1995, and has widely contributed to the reinforcement of the existing 500kV Transmission network, supplying all the 500kV substations along the second new Transmission Line linking North to South Vietnam.

Since the beginning of 2009, Alstom Grid has secured several Utility and Industry projects:

- 500kV Pleiku-PhuLam Substations (2003)
- Pleiku-Danang 500kV (2003)
- 500kV Nho Quan & Hatinh substations (2003)
- 500kV Nha Be - Omon T/L (2007)
- 500KV Phu My substation (2009)
- 500kV Tan Dinh Phase 2 substation (2009)
- 500kV Son La-Hoa Binh-Nho Quan Link (2009)
- 500kV Dak Nong substation (2009)
- 500kV Hiep Hoa substation (2009)
- 220KV Nhon Trach 2 substation + eBOP (2009)
- 500KV Phu Lam substation (2010)
- 220KV Nhi Son 1 and eBOP (2010)
- 220KV Duc Hoa Substation (2012)
- 500KV Vinh Tan & My Tho Substations (2012)
- 500kV Switchyard for Vung Ang Power Center (2012)
- 500KV Pleiku – My Phuoc – Cau Bong Substation (2013)
- 500kV Quang Ninh Unit 2 (2013)
- 500kV Cau Bong substation (2013)
