A contract in the USA worth $194 million

Alstom will modernize PATCO’s metro fleet operated between Philadelphia and Southern New Jersey

New York, New York - Alstom Transport has won a contract worth $194 million USD to execute the complete overhaul of the Port Authority Transit Corporation (PATCO) metro fleet. These trains, which run from Philadelphia to nearby suburbs in Southern New Jersey, carry approximately 40,000 riders each day. PATCO’s metro transit system consists of 120 passenger cars, many of which have been in operation since the system’s 1969 opening. Work on the five-year project is scheduled to begin later this month. This contract is the largest capital improvement project in the history of the Delaware River Port Authority (DRPA), the regional transportation agency that owns and operates PATCO.

The PATCO fleet modernization will deliver a superior passenger experience by improving both internal and external systems. The cars will be enhanced with a full range of equipment and technology, including new couplers, car-borne propulsion technology and modern braking systems, automated train control (ATC) equipment, door operator and control systems, interior finishing including lighting and seats, air-conditioning systems, new communication and information displays.

The entire refurbishment and testing process will be managed by Alstom’s Train Life Services (TLS) unit and take place in Alstom’s rolling stock manufacturing facility in Hornell, NY - the largest of its kind in the United States. The Hornell site works under the Alstom Production System (APSYS), which ensures sustainable, efficient and effective production for all projects. Experts at Alstom’s Hornell facility also will also perform on site testing of the completed cars to ensure safety and reliability.

"Everyone at Alstom is proud that PATCO has chosen our team to deliver the level of comfort, reliability and performance their riders expect from a 21st century transit system," said Guillaume Mehlman, Managing Director, Alstom Transport North America Region. “Having delivered successful metro modernization projects throughout the United States, we are confident in our ability to provide a superior product, and we look forward to working closely with PATCO to once again meet that standard of excellence.”
About PATCO

PATCO (Port Authority Transit Corporation) is owned and operated by DRPA (Delaware River Port Authority) and connects Philadelphia to nearby suburbs in Southern New Jersey. There are a total of 13 PATCO metro stations including; 9 in New Jersey, and 4 in Pennsylvania. PATCO has 325 full-time employees who perform various tasks related to rail safety, operations and maintenance.

About Alstom Transport

A promoter of sustainable mobility, Alstom Transport develops and markets the most complete range of systems, equipment and services in the railway sector. Alstom Transport manages entire transport systems, taking in rolling stock, signaling and infrastructure, and offers “turnkey” solutions. Alstom Transport recorded sales of 5.8 billion euros in the fiscal year 2009-2010. Alstom Transport is present in over 60 countries and employs some 26,000 people. The company is a key player in the North American market and currently operates the largest passenger rolling stock manufacturing facility in the United States, located in Hornell, New York, which provides extensive rehabilitation and new car production capabilities. Alstom’s Transport Information Solutions (TIS) team, headquartered in Rochester, New York, is a leading provider of signaling and train control systems.
