

## **Alstom appoints Michael Keroullé as new President of Alstom Americas** **Brings 24 years of experience in regional & global leadership roles**

**22 July 2021** – Alstom announced that it has appointed Michael Keroullé as President of Alstom’s Americas Region, effective July 1<sup>st</sup>. Michael is responsible for the execution of the Alstom in Motion strategy in the Americas and the region’s commercial and operational performance, as well as the continued regional integration of Bombardier Transportation. In his role, Michael is a member of Alstom’s Executive Committee and Leadership Team, reporting to Henri Poupart-Lafarge, Alstom’s Chairman of the Board and Chief Executive Officer.

Michael joined Alstom following the company’s acquisition of Bombardier Transportation earlier this year. Previously, he was President & CEO of General Electric (GE) Steam Power, a \$4.5 billion business with 10,000 employees in 60 countries and a global leader for large systems and services in the energy sector.

During his 24-year career, Michael has held several global leadership roles at GE, Alstom Power and Lurgi, and has worked on four continents. As Chief Commercial Officer for GE Steam Power, he drove business growth despite declining market dynamics. At Alstom Power, Michael led several multi-unit regional P&L organizations as General Manager/Managing Director in the Middle East, India and Europe.

Through each of these roles, Michael has gained a track record of driving customer centricity and operational rigor to deliver solid results for customers and for his business, building and leading diverse and multicultural high impact teams through important transformations, including post-merger integration.

Michael holds a master’s degree in chemical engineering from the Université de technologie de Compiègne (UTC) in France and is an alumnus of INSEAD Executive Education.

---

**About Alstom**

Leading societies to a low carbon future, Alstom develops and markets mobility solutions that provide the sustainable foundations for the future of transportation. Alstom's products portfolio ranges from high-speed trains, metros, monorail, and trams to integrated systems, customized services, infrastructure, signaling and digital mobility solutions. Alstom has 150,000 vehicles in commercial service worldwide. With Bombardier Transportation joining Alstom on January 29, 2021, the enlarged Group's combined proforma revenue amounts to €14 billion for the 12-month period ended March 31, 2021. Headquartered in France, Alstom is now present in 70 countries and employs more than 70,000 people. [www.alstom.com](http://www.alstom.com)
