

New edition of the Alstom Talent Energy programme for young graduates

Selection process open until September 24

To date, more than 250 young graduates have participated in this programme, which offers scholarships for postgraduate studies and professional work placements at Alstom sites in Madrid and Barcelona

Madrid, 14 September 2021 - Alstom, in collaboration with Fundación Universidad-Empresa, has launched the ninth edition of its programme for young graduates in Spain, an initiative that aims to train and integrate them into the labour market.

This 12-month programme, called Alstom Talent Energy, combines Universidad de Alcalá post-graduate training and professional work placements at Alstom sites in Madrid and Barcelona.

“With this successful programme, in which more than 250 graduates have already participated, we provide opportunities for recent graduates to continue their personal and professional development in a global company such as Alstom, a world leader in the mobility industry. The promotion of young talent and their professional development is a strategic pillar for our company,” says Reyes Torres, Alstom Human Resources Director for Spain and Portugal.

This year, Alstom in Spain will incorporate 14 interns with different academic backgrounds including Industrial Engineering, Industrial Organization, Electrical Engineering or Business Administration and Management, among others. Successful candidates will start working in the company's sites in Madrid or Barcelona, joining Alstom's team of professionals to work on national and international rail projects. Successful candidates will also get a scholarship to join the postgraduate course “Agile Organizations and Digital Transformation” at the University of Alcalá.

The submission period to participate in this edition of the programme is open until September 24th. The programme itself, which is undertaken in collaboration with the Fundación Universidad-Empresa (Universities and Businesses Foundation), will start on November 22nd. Those interested should apply using the following link: www.talentoteca.es/alstom
