

Alstom Foundation to support more projects around the world

- The Foundation supports and funds projects aimed at improving living conditions in communities where we work and live
- The new Alstom is reflected by a 50% increase in budget, the selection of more projects than usual and in addressing several new countries

5 November 2021 – The Alstom Corporate Foundation has announced its final selection of 38 projects, originating in 24 different countries, to receive funding for the fiscal year to come. Along with the record number of 189 projects submitted, the selected projects demonstrate Alstom employees' enthusiasm for philanthropy and for supporting local communities, as well as Alstom's increased footprint since the integration of Bombardier Transportation.

"There has been a great enthusiasm from both NGOs and Alstom employees this year, and this has translated into a record number of project submissions. If the 2020 cycle was marked primarily by the pandemic, 2021 stands out as the year in which we gained many new colleagues, so many of whom are already showing their willingness to contribute to good causes. The size of the new Alstom is reflected by an increase of the Foundation budget to €2.2 million, resulting in the selection of more projects than usual and in addressing several new countries. I'm very pleased to see this engagement to aid communities in so many different places where we work and live," says Anne-Cecile Barbier, Secretary General of the Alstom Foundation.

This year, the Foundation's Board has selected 38 projects for funding from its 2021/22 budget – a significant increase on the 29 projects selected and funded last year. Including this selection, the Foundation will have supported 277 projects in all Alstom regions since it was first created 14 years ago.

This year's projects:

Established in 2007, the Alstom Foundation supports and funds projects proposed by Alstom employees who team up with local NGO partners and not-for-profit organisations to carry out

initiatives aimed at improving living conditions in communities located near the Group's facilities and project sites around the world. The Foundation's projects focus on four axes: Mobility, Environmental Protection, Energy & Water, and Socio-Economic Development.

About Alstom

Leading societies to a low carbon future, Alstom develops and markets mobility solutions that provide the sustainable foundations for the future of transportation. Alstom's product portfolio ranges from high-speed trains, metros, monorails and trams, to integrated systems, customised services, infrastructure, signalling, and digital mobility solutions. Alstom has 150,000 vehicles in commercial service worldwide. With Bombardier Transportation joining Alstom on January 29, 2021, the enlarged Group's combined proforma revenue amounts to €14 billion for the 12-month period ended March 31, 2021. Headquartered in France, Alstom is now present in 70 countries and employs more than 70,000 people.
