Disclaimer

- This presentation contains forward-looking statements which are based on current plans and forecasts of Alstom’s management. Such forward-looking statements are relevant to the current scope of activity and are by their nature subject to a number of important risks and uncertainty factors (such as those described in the documents filed by Alstom with the French AMF) that could cause actual results to differ from the plans, objectives and expectations expressed in such forward-looking statements. These such forward-looking statements speak only as of the date on which they are made, and Alstom undertakes no obligation to update or revise any of them, whether as a result of new information, future events or otherwise.

- This presentation does not constitute or form part of a prospectus or any offer or invitation for the sale or issue of, or any offer or inducement to purchase or subscribe for, or any solicitation of any offer to purchase or subscribe for any shares or other securities in the Company in France, the United Kingdom, the United States or any other jurisdiction. Any offer of the Company’s securities may only be made in France pursuant to a prospectus having received the visa from the AMF or, outside France, pursuant to an offering document prepared for such purpose. The information does not constitute any form of commitment on the part of the Company or any other person. Neither the information nor any other written or oral information made available to any recipient or its advisers will form the basis of any contract or commitment whatsoever. In particular, in furnishing the information, the Company, the Banks, their affiliates, shareholders, and their respective directors, officers, advisers, employees or representatives undertake no obligation to provide the recipient with access to any additional information.

- Any reference in this document to variations «Pro forma like-for-like», on orders and sales, correspond to a combined, non-audited, group vision including Alstom legacy fiscal year 2020/21 and legacy Bombardier Transportation contribution for 9 months of their fiscal year 2020 (April to December 2020) and January 2021 and is in line with Alstom accounting methods. The variations calculated using these combined figures exclude any scope and Forex adjustments.

FY 2021/22 Highlights

Henri Poupart-Lafarge
Chairman and CEO
FY 2021/22 targets achieved

- **€19.3bn ORDER INTAKE**: Solid order intake reflecting the enlarged group momentum, with a book-to-bill at 1.25. Backlog now at a record €81bn.

- **€15.5bn SALES**: Sales increase by +11% compared to last year proforma and by +7.9% H2 2021/22 vs H1 2021/22.

- **5.0% aEBIT MARGIN**: aEBIT progressive recovery in H2 2021/22, with projects stabilisation executed as planned.

- **€(992)m FCF**: Positive Free Cash Flow in H2 2021/22 at +€469m driven by a positive Working Capital evolution.
... while managing macro-environment headwinds

**INFLATION**
- No material impact in FY 2021/22 financial results

**ELECTRONICS SHORTAGES**
- No material impact in FY 2021/22 financial results

**RUSSIA**
- Very limited direct exposure to Russia and to Ukraine
- Non-cash impairment charge of the 20% stake in TMH impacting net income by €(441)m

**C19 & CHINA LOCKDOWNS**
- No material impact in FY 2021/22
Successful first year integrating Bombardier Transportation

- Very robust commercial momentum and high customer satisfaction
  Backlog execution delivered as per target

- One Alstom team: Global key processes and IT tools convergence on track

- Integrated R&D plan for further competitiveness and innovation as a differentiator

- Synergies delivered as planned in first year, run-rate better than expected

Integration acceleration, synergies on-track and confirmed financial trajectory

- 8.1 NPS¹ for Top 100 Customers
- 80% Key global processes converged
- 100% Products convergence validated
- €102m Synergies delivered in 2021/22

UPDATE DURING Q4 2021/22 ON LEGACY PROJECTS

- Technical issues: solutions agreed with customers
- Production resumed
- Trains acceptance process resumed
- Sales delivery as announced at H1 and at Q3 2021/22
- Settlements negotiations with customers reached in most cases
  - 13 negotiations closed out of 15, 2 still on-going
  - Gross exposure around €2bn range at the time of acquisition now globally mitigated

Commercial and operational execution in line with trajectory

Major milestones in our smarter and greener mobility innovation roadmap

**KEEPING THE EDGE IN ZERO EMISSION SOLUTION**
- Partnership to decarbonate freight with an H2 solution
- First battery train tested in passenger operation with Deutsche Bahn
- Hybrid Régiolis tested in France -20% Energy consumption

**ENHANCING PASSENGER COMFORT**
- PEPA™ filter, an antiviral HVAC filter that catches and kills viruses, including the coronavirus
- -99.8% Virus reduction
- -99.9% Bacteria reduction

**PAVING THE WAY TO FULL AUTONOMY BY 2023**
- Semi-autonomous operation with SNCF in trial phase

Level of net R&D spending totaling 3.4% over Sales, in line with our trajectory
Business model serving EU’s ambitious goal of carbon neutrality by 2050

High eligibility reflects the importance of the Group’s activities for sustainable mobility

¹ The EU Taxonomy regulation (Regulation (EU) 2020/852) was introduced to propose a framework to facilitate sustainable investment as part of EU’s efforts to implement the European Green Deal. Taxonomy-eligibility should not be used as an indication of Taxonomy-alignment. The Group shall carry out a detailed and extensive analysis of Taxonomy-alignment using the technical environmental and social specific criteria laid out in the regulation and report it next fiscal year as requested under the EU Taxonomy legislation.

---

**Working Capital without provisions**

- Major evolution during H1 2021/22 due to:
  - Suppliers overdues and terms of payment normalization
  - Restart of production at major BT legacy sites
- Expected limited normalization over the next three years:
  - Safety stocks due to supply chain challenges on short-term, continuous ramp-up
  - Cash focus programme including rigorous tender process, control on inventories and operation process optimisation

**Provisions**

- Decrease of contract-related provisions along with non-performing backlog execution

---

Subject to usual short-term volatility, global stabilization of Working Capital after the execution of the non-performing backlog

¹ graph for illustrative purpose, not at scale
### DELEVERAGE LEVERS

- **Net debt**
  - FCF generation towards > 80% Cash conversion
  - Rigorous Working capital management
  - Controlled Capex and M&A
  - Balanced dividend policy

- **Profit**
  - Top line growth from healthy order intake
  - Backlog execution
  - Synergies

- **Comfortable liquidity maintained**

Targeting significant Net Debt deleverage by FY 2024/25
Key priorities for FY 2022/23

**GROW**
- Selectivity on order intake supported by market momentum
- Rigorous tender process
- Pursue quality dialogue with customers on legacy backlog execution

**DELIVER**
- Mitigate supply chain shortages and C19 / China lockdowns
- Adapt to new inflation environment
- Finalize stabilisation of the legacy backlog execution
- Pursue intense integration efforts and transformation of our operations based on Alstom playbook
- Focus on cost-out, synergies and cash generation

**INNOVATE**
- Leverage the enlarged group size to boost R&D

**PEOPLE**
- Manage the resources challenge

Pursuing the path to profitable growth while managing short-term headwinds

Financial trajectory confirmed

FY 2022/23 OUTLOOK

- Sales growth supported by solid order backlog and Book to bill above 1
- Progressive aEBIT margin increase vs FY 2021/22 through healthy order intake and sound backlog execution
- Free Cash Flow generation\(^6\)

As the basis for its 2022/23 outlook, the Group assumes neither further disruptions to the world economy (including further inflation or aggravated geopolitical crisis), nor significant supply-chain shortages, that would materially impact the Group’s ability to deliver products and services.

Financial trajectory fully confirmed as per Alstom in Motion 2025

1. Between 2020/21 and 2024/25 2. CAGR between Sales PF 2020/21 and 2024/25 3. From 2024/25 onwards 4. From 2024/25 onwards. Subject to short term volatility 5. The pay-out ratio is calculated by dividing the amount of the overall dividend with the “Adjusted net profit from continuing operations attributable to equity holders of the parent, Group share” as presented in the management report in the consolidated financial statements. 6. Subject to short term volatility

1. Excludes PPA other than related to the purchase of Bombardier Transportation

- The PPA amortisation plan will be subject to FX evolution in future years or subject to potential impairments
- Refer to Note 1.1.1 for explanations on amortisation duration
Reconciliation between consolidated income statement and the MD&A management view as of 31 March 2022

### Adjustments as of 31 March 2022:

1. Impact of business combinations: amortisation of assets exclusively valued when determining the purchase price allocation (PPA), including corresponding tax effect;
2. Impact of Aptis closure: reclassification of operational results as non-recurring items following Alstom’s announced and planned discontinuance of Aptis activities;
3. Reclassification of other operational costs to non-recurring items;
4. Reclassification of share in net income of the equity-accounted investments when these are considered to be part of operating activities of the Group

Adjustments as of 31 March 2021:

1. Impact of business combinations: amortisation of assets exclusively valued when determining the purchase price allocation (PPA), including corresponding tax effect;
2. Impact of Apts closure: recategorisation of operational results as non-recurring items following Alstom’s announced and planned discontinuance of Apts activities;
3. Recategorisation of other operational costs to non-recurring items;
4. Recategorisation of share in net income of the equity-accounted investments when these are considered to be part of operating activities of the Group.
Appendix - Non-GAAP financial indicators definitions (1/2)

This section presents financial indicators used by the Group that are not defined by accounting standard setters.

• **Orders received**
  A new order is recognised as an order received only when the contract creates enforceable obligations between the Group and its customer. When this condition is met, the order is recognised at the contract value. If the contract is denominated in a currency other than the functional currency of the reporting unit, the Group requires the immediate elimination of currency exposure using forward currency sales. Orders are then measured using the spot rate at inception of hedging instruments.

• **Book-to-Bill**
  The book-to-bill ratio is the ratio of orders received to the amount of sales traded for a specific period.

• **Proforma like-for-like new Alstom**
  Alstom’s variations, orders and sales, correspond to the like-for-like variation of Alstom after the acquisition of Bombardier Transportation integrating Bombardier Transportation over the comparable periods preceding the acquisition. The pre-acquisition financial data used to calculate the "proforma like-for-like New Alstom" variations, sales, are extracted from the historical accounts of Alstom and Bombardier Transportation respectively. In order to ensure the comparability of the results, the proforma restatements as presented in chapter 3 of the URD “Unaudited proforma Condensed Financial Information as of 31 March 2021” have been applied. Data related to the commercial performance correspond to orders intake recorded by Alstom and Bombardier Transportation integrating Bombardier Transportation over the comparable periods preceding the acquisition. These indicators are not presented on an organic basis and, therefore, are not restated in order to eliminate the impact of changes in scope of consolidation and changes resulting from the translation of the accounts into euro following the variation of foreign currencies against the euro.

Sales Q1, Q2 and Q3 2020/21 of Bombardier Transportation were converted at the average quarterly foreign exchange rate EUR/USD of 1/1.1004 for Q1 as communicated in Bombardier Inc Q2 2020 financial report; 1/1.1648 for Q2 as communicated in Bombardier Inc Q3 2020 financial report; 1/1.1910 for Q3 as communicated in Bombardier Inc Q4 2020 financial report.

Sales Q4 corresponds to like-for-like variation for Alstom and Bombardier Transportation combined, considering the activity of Bombardier Transportation as a whole until the closing date as of Jan 29th 2021 and the Q4 2020/21 of New Alstom which included Alstom legacy Q4 2020/21 and Bombardier Transportation contribution for 2 months (February and March 2021). Bombardier Transportation monthly financial data of January 2021 (unaudited) are extracted from the Bombardier Transportation management account in euros. Financial data post acquisition date are extracted from the historical statements of Alstom and Bombardier Transportation combined, prepared in euros under IFRS.

Orders received Q1, Q2 and Q3 2020/21 of Bombardier Transportation were converted at the quarterly closing foreign exchange rate EUR/USD of 1/1.1284 for Q1 as communicated in Bombardier Inc Q2 2020 financial report; 1/1.1702 for Q2 as communicated in Bombardier Inc Q3 2020 financial report; 1/1.2271 for Q3 as communicated in Bombardier Inc Q4 2020 financial report.

Bombardier Transportation orders for Jan 2021 were extracted from the Bombardier Transportation management account in euros.

• **Adjusted Gross Margin before PPA**
  Adjusted Gross Margin before PPA is a Key Performance Indicator to present the level of recurring operational performance. It represents the sales minus the cost of sales, adjusted to exclude the impact of amortisation of assets exclusively valued when determining the purchase price allocations ("PPA") in the context of business combination as well as non-recurring “one off” items that are not supposed to occur again in following years and are significant.
Appendix 1 - Non-GAAP financial indicators definitions (2/2)

- **Adjusted EBIT**
  Adjusted EBIT ("aEBIT") is the Key Performance Indicator to present the level of recurring operational performance. This indicator is also aligned with market practice and comparable to direct competitors.

Starting September 2019, Alstom has opted for the inclusion of the share in net income of the equity-accounted investments into the aEBIT when these are considered to be part of the operating activities of the Group (because there are significant operational flows and/or common project execution with these entities). This mainly includes Chinese joint-ventures, namely CASCO joint-venture for Alstom as well as, following the integration of Bombardier Transportation, Alstom Sifang (Qingdao) Transportation Ltd. (former Bombardier Sifang), Bombardier NUG Propulsion System Co. Ltd. and Changchun Changke Alstom Railway Vehicles Company Ltd (former Changchun Bombardier). aEBIT corresponds to Earning Before Interests and Tax adjusted for the following elements:

- net restructuring expenses (including rationalization costs);
- tangibles and intangibles impairment;
- capital gains or loss/revaluation on investments disposals or controls changes of an entity;
- any other non-recurring items, such as some costs incurred to realize business combinations and amortization of an asset exclusively valued in the context of business combination, as well as litigation costs that have arisen outside the ordinary course of business;
- and including the share in net income of the operational equity-accounted investments.

A non-recurring item is a "one-off" exceptional item that is not supposed to occur again in following years and that is significant.

Adjusted EBIT margin corresponds to Adjusted EBIT expressed as a percentage of sales.

- **EBIT before PPA**
  Following the Bombardier Transportation acquisition and with effect from these fiscal year 2021/22 condensed interim consolidated financial statements, Alstom decided to introduce the "EBIT before PPA" indicator aimed at restating its Earnings Before Interest and Taxes ("EBIT") to exclude the impact of amortisation of assets exclusively valued when determining the purchase price allocations ("PPA") in the context of business combination. This indicator is also aligned with market practice.

- **Adjusted net profit**
  Following the Bombardier Transportation acquisition and with effect from these fiscal year 2020/21 consolidated financial statements, Alstom decided to introduce the "adjusted net profit" indicator aimed at restating its net profit from continued operations (Group share) to exclude the impact of amortisation of assets exclusively valued when determining the purchase price allocations ("PPA") in the context of business combination, net of the corresponding tax effect. This indicator is also aligned with market practice.

- **Free cash flow**
  Free cash flow is defined as net cash provided by operating activities less capital expenditures including capitalised development costs, net of proceeds from disposals of tangible and intangible assets. In particular, free cash flow does not include any proceeds from disposals of activity.

The most directly comparable financial measure to free cash flow calculated and presented in accordance with IFRS is net cash provided by operating activities.

- **Net cash/(debt)**
  The net cash/(debt) is defined as cash and cash equivalents, marketable securities and other current financial asset, less borrowings.
