

Alstom appoints Jean-Michel Morvan as Managing Director for Southern Latin America

- Jean-Michel Morvan will lead Alstom's operations in Argentina, Chile, Peru, and Ecuador from Santiago, Chile, covering all product lines.
- The executive has approximately 20 years of experience within the company, with a strong track record in general management, P&L responsibility, and leadership of complex projects across multiple countries and continents.

25 May, 2026 – Alstom, global leader in smart and sustainable mobility, announces the appointment of Jean-Michel Morvan as Managing Director of Alstom for Southern Latin America. Based in Santiago, Chile, he will lead the company's operations in Argentina, Chile, Peru, and Ecuador, covering all product lines and overseeing the region's overall business performance.

With approximately 20 years of experience at Alstom, Jean-Michel Morvan has a strong track record in general management, P&L responsibility, and the leadership of large, complex turnkey and consortium projects across multiple countries and continents. His career includes senior roles such as Managing Director in Panama, Consortium Projects Director, and Bid Director for turnkey projects in North America, where he was responsible for business performance across multiple countries and for relationships with public authorities and key stakeholders.

"I take on this role with the commitment to strengthening Alstom's performance in Southern Latin America. This region represents a strategic opportunity for our company, and my priority is to drive business growth in a challenging market, strengthen our relationships with customers and stakeholders, and ensure excellence in execution across all our projects," said Jean-Michel Morvan.

Regarding Chile, he stated: "At Alstom, we have a long-term commitment to the country, where we will soon mark 80 years of presence, having worked alongside Metro de Santiago for more than 50 years, while also collaborating with EFE Valparaíso and the entire EFE Trenes network. We have broad capabilities to deliver smart mobility solutions, including rolling stock, signalling systems, infrastructure, and services, and we remain committed to continuing to contribute to the development of transport in the country."

Jean-Michel Morvan is a French engineer with extensive experience in the railway sector and in project management on a global scale. He previously held several strategic positions within Alstom. Before taking on his current role, from 2022 to 2026, he led the teams responsible for delivering one of the world's most ambitious and complex automated metro projects, the Réseau Express Métropolitain (REM) in Montreal, Canada. He graduated from the *École Nationale Supérieure d'Arts et Métiers ParisTech*, where he earned his engineering degree.

Alstom in Chile

Alstom has been present in Chile for more than 75 years, contributing to the development of the country's infrastructure, social progress, and environmental sustainability. As the main supplier of metro systems in Santiago and Valparaíso, Alstom offers a wide range of innovative products and services. Economic growth has driven the need for urban, interurban, and freight railway infrastructure, and Alstom brings its expertise to all three areas, committed to improving quality of life and safety.

With more than 600 employees in 8 centers, Alstom operates in Chile with metropolitan trains, regional trains, signalling systems, and infrastructure and maintenance services. The company participates in major railway projects throughout the country, including those of the Santiago Metro, EFE Valparaíso, and the State Railways Company (EFE), such as the Alameda-Nos line.

To date, Alstom has supplied the Santiago Metro with the NS74, NS93, AS02, NS04, and NS16 fleets. These will soon be joined by the new AS22 trains for Line 7.
