

Alstom secures 5-year maintenance service agreement at the Nagpur depot for WAG-12B electric locomotives through its joint venture with Indian Railways (MELPL)

- The contract covers five-year maintenance services agreement for 250 high-powered WAG-12B electric locomotives at the Madhepura Electric Locomotive Private Limited (MELPL) Nagpur Depot.
- The €107 million contract reaffirms Indian Railways' trust in Alstom's world-class service capabilities, following four years of highly successful operations.

26 June 2026 – Alstom, a global leader in smart and sustainable mobility, today announced that its joint venture with Indian Railways, Madhepura Electric Locomotive Private Limited (MELPL), has been awarded a new five-year maintenance services contract. Valued at **€107 million**, the agreement covers the comprehensive maintenance of 250 WAG-12B electric locomotives at the MELPL Nagpur Depot. This contract renewal follows the successful execution of the previous four-year agreement and underscores Indian Railways' continued confidence in Alstom's high-quality services. The Nagpur depot has become a benchmark for collaborative excellence and operational success in the Indian rail sector.

Olivier Loison, Managing Director – Alstom India said, "This contract renewal is a strong validation of our commitment to Indian Railways and the success of our partnership. We are proud that the trust placed in us has translated into proven performance and reliability of the WAG-12B e-loco, which are vital to India's freight revolution."

The 12,000 HP Prima T8 WAG-12B locomotives are fundamental to India's green mobility goals, capable of hauling 6,000-tonne loads at speeds of up to 120 kph. They serve as the workhorses of the Dedicated Freight Corridors, significantly increasing freight capacity while lowering carbon emissions.

Under the agreement, MELPL's scope includes the full maintenance of the 250 locomotives and the depot's infrastructure. To ensure rapid issue resolution and maximize fleet availability, Alstom will continue to deploy its specialized **Prompt Response Teams (PRTs)** equipped with tools and spares at strategic locations across the country. The contract also reinforces Alstom's commitment to skill development through ongoing training programs at the depot.

Alstom in India

Alstom is the only multinational sustainable mobility provider in India, to have a comprehensive portfolio of offerings to meet customer specific needs and continues to be a strategic partner in

supporting India's rail revolution. With 6 industrial sites and 5 major engineering centres, the company caters to domestic as well as international project needs with its world class rolling stock, components, signalling and services solutions. Fully aligned with the country's vision of Make-in-India and Atmanirbhar Bharat, Alstom remains deeply committed to strengthening its local sourcing and supply chain ecosystem.

ALSTOM™ and Prima T8™ are protected trademarks of the Alstom Group.

About Alstom

Alstom is the pure rail leader, committed to making rail the backbone of sustainable transportation. We design and deliver a complete range of future-ready solutions – from high-speed and regional trains to metros, monorails, trams, turnkey systems, end-to-end services, infrastructure, signalling and digital rail solutions. With 87,800 people in 61 countries, Alstom brings together global expertise and multi-local presence to make every journey smarter, cleaner and more enjoyable. Together with our partners and customers, we realise the power of rail. Listed in France, Alstom generated revenues of €19.2 billion for the fiscal year ending 31 March 2026.
